

TRANSITIONS

Divide into groups based on specific transitions that have been mentioned so far. For example, if you want to discuss the transition to ninth grade, join with others who are interested in that same transition.

01 What are the most poignant needs of a student in this particular transition? (Some of these may have been mentioned already; it's okay to repeat what's been said.)

02 How could you communicate your unconditional support and care for a student in the midst of this transition?

03 How do you think that support would make a difference in their faith?

04 What conversation topics would you want to address with a student who was navigating this transition?

05 What ideas do you have for our ministry as a whole to better support students through this particular transition?
